The diagrams show the construction of a 4x4 grid with a diagonal line and a gear icon. The first diagram shows a 4x4 grid of dots with a diagonal line from the top-left to the bottom-right. The second diagram shows the same grid with a gear icon added at the bottom-right. The third diagram shows the same grid with a gear icon added at the bottom-right. The fourth diagram shows the same grid with a gear icon added at the bottom-right.

A 5x5 grid of blue spheres. A blue cylinder is placed diagonally across the grid, and a blue pen is positioned at the bottom right corner.

The diagrams illustrate the iterative process of reducing a 4x4 grid to a 1x1 grid. In each step, the last row and the last column of the current grid are removed. The first diagram shows a 4x4 grid with a blue diagonal line and a small blue arrow pointing to the bottom-right element. The second diagram shows a 3x3 grid. The third diagram shows a 2x2 grid. The fourth diagram shows a 1x1 grid.

A 5x5 grid of blue spheres. A blue cylinder is overlaid diagonally from the bottom-left to the top-right. A yellow pyramid is overlaid in the bottom-right corner.

The diagrams illustrate the iterative process of reducing a 4x4 grid to a 1x1 grid. Each step involves removing the outermost layer of the grid, which is represented by a blue line and a yellow pyramid. The first diagram shows a 4x4 grid with a blue line and a yellow pyramid. The second diagram shows a 3x3 grid with a blue line and a yellow pyramid. The third diagram shows a 2x2 grid with a blue line and a yellow pyramid. The fourth diagram shows a 1x1 grid with a blue line and a yellow pyramid.

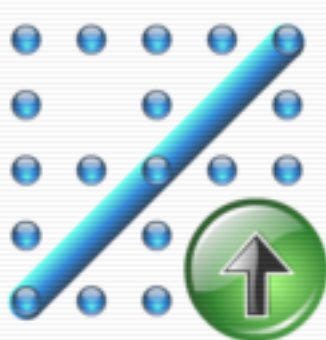

The diagrams illustrate the iterative reduction of a 4x4 grid. Each step shows the removal of the last row and column, with the remaining elements shifted one position to the right and down. The final 1x1 grid contains the element at the top-left corner of the original 4x4 grid.

border_diagonal.b.help.png

A 5x5 grid of blue spheres. A blue line starts from the top-left sphere and extends diagonally down to the right, passing through the center of the grid. At the bottom-right end of this line, there is a grey, telescope-like structure with two purple lenses.
